

PURSUE A CAREER IN **MEDICAL LABORATORY SCIENCE**

Combine your passions for science, medicine
and patient care to make a meaningful impact!

Grand Canyon University's Bachelor of Science in Medical Laboratory Science is where laboratory science meets the practice of medicine. Medical laboratory science professionals play a pivotal role in health care by performing critical tests on blood, tissue and body fluids to support physicians in the diagnosis, treatment and prevention of diseases.

As a medical laboratory scientist, you may have the opportunity to work in clinical laboratories in large medical centers, hospitals and clinics or conduct research in industrial, public health and medical laboratories.

Why Choose GCU's Medical Laboratory Science Degree?

GCU's program is designed for flexibility, allowing you to complete your first two years either on campus or remotely. In your third year, after "Secondary Acceptance," you'll transition to campus and begin clinical experiences, participating in hands-on learning that can prepare you for future career opportunities. For your fourth year, you'll have the option to stay on campus or finish the program remotely while building on your clinical experience.
